## 2014 National Emissions Inventory (NEI) Data

Documentation

Data Summaries

Data Queries

Facility Mapping

### Documentation

The NEI database includes air emissions sources of both criteria and hazardous air pollutants. Data are available for many facilities and as county totals. The 2014 NEI is the next inventory on the three-year cycle and the EPA will create it using data provided by State, Local and Tribal air agencies. The [Emissions Inventory System](#) (EIS) helps the EPA to build the NEI.
